1. **GUIDELINE**
It is a requirement of Nursing Practice 366 that all students who want to experience a rural or remote setting will need to achieve the ANMC competencies related to this unit.

2. **PROCEDURE**
An OCC will be sent to all students undertaking NP 366 at the beginning of the semester to remind them of the rural and remote placement opportunities.

For some regional areas, accommodation and financial support may be available to students. Please contact the Clinical Office for this information.

Placement to a metropolitan health facility will be granted to those students who do not want a rural or remote experience. This will be undertaken as normal through the preference selection via SONIA.
